

INTERNATIONAL DOPING TESTS & MANAGEMENT

COVID-19 TESTING SERVICES

GETTING YOU BACK TO SPORT

International Doping Tests & Management (IDTM) recognizes the overwhelming need for large-scale testing in order for institutions to safely return to administering on-campus sport practices and events. Understanding that time is of the essence, IDTM has expanded its testing services to offer clients COVID-19 PCR and antibody testing for athletes and staff. IDTM can provide testing kits and conduct sample collection on site. As an expert in third party testing administration with a worldwide network of collection personnel, IDTM is prepared to meet your COVID-19 testing needs.

TESTING OPTIONS

 **COVID-19 PCR Test**
Nasal, throat and saliva-based test, or if necessary nasopharyngeal swabbing, that checks for active infection in both asymptomatic and symptomatic populations. The test will detect three gene transcripts specific to the COVID-19 virus. Presence of the virus is detectable within two days of infection and up to 28 days after infection.

 **COVID-19 Antigen Test**
A rapid diagnostic test that checks for current infection of COVID-19. The test can identify the presence or absence of an antigen. The results will detect SARS-CoV-2, the virus that causes COVID-19.

 **COVID-19 Antibody Test**
A blood test that checks for past infection/immunity of COVID-19. The lab analysis can identify all three antibodies (IgA, IgM and IgG). The results will note the presence, or lack of, COVID-19 antibodies in the individual.

All samples collected in Sweden are processed by the accredited Karolinska Institute laboratory. IDTM currently partners with laboratories in more than 40 countries.

FOUR STEPS TO RESULTS

1

IDTM receives client testing details.

2

IDTM provides collection kits and performs collection.

3

Sample collection personnel collect and ship samples to the laboratory.

4

Results report **within 24 hours** to client.

IDTM is ISO 9001:2015 Certified

IDTM encourages everyday preventive measures to help limit the spread of COVID-19. We have made modifications to all our collection processes, including the use of PPE where appropriate. Additionally, we recommend Sample Collection Personnel follow public health and safety guidance provided by local authorities, the World Health Organization (WHO) and the Centers for Disease Control and Prevention (CDC).
